1. In response to the request from [redacted] to designate someone to 25X1A
team with [redacted] project SIC has nominated [redacted] 25X1A9a
[redacted] is not only the best equipped of SIC staff to handle the subject,
but was particularly interested in doing this job. [redacted] has indicated that 25X1A
[redacted] is acceptable to them for this assignment, and we're hoping that we
don't have another [redacted] involving a last moment veto by 25X1A9a
the station.

2. The SIC staff feels that the experimental CT program just
completed was reasonably successful, and that a number of significant
lessons were learned in terms of the configuration of the next program.
The doldrums which we had anticipated did not develop; class interest and
participation remained at a high level. This is not to say that class
members had no serious criticisms. They did! The critiques were less
than ecstatic, but seem to be quite fair and balanced. The comments, in
general, suggest that the program should move in directions in which we
are trying to move, but which could not be fully achieved in the brief
planning time available. One particularly interesting factor is the num-
ber of suggestions that an examination be included--as a spur to doing
the work! +
